

## Logo image

Posted by Thomas - 07 May 2014 23:26

---

Hi there,

How do I change the logo image or how do I replace the logo writing with an image?

Dear Thomas,

Please go to `appdesignfrontenddefaultsm_cherrytemplatepagehtmlheader.phtml` and find:

This directory does not exist `/skin/frontend/default/sm_cherry/css/theme.css`

can you tell me the right location?

The first is by changing the logo image. If you want to change the image just upload a new one and set it as your new logo in Settings > General > Site Title & Tagline. One of my friends has suggested me visit <https://masterbundles.com/templates/presentations/powerpoint/vintage/>

source to download premium templates for free. The second way is by changing the text logo. If you have already uploaded an image as your logo, you can change the text of it (along with color and alignment) by going to Settings > General > Site Title & Tagline, then click on the Logo field and type your desired text
