

category selector doesn't work

Posted by Sergio Wong Chung - 12 Nov 2016 19:12

Hi,

Category selector loads products from other subcategory with same name.

We have in example: category x > Ladies but also category y > Ladies

If we use selector on category y > Ladies it loads products from category x > ladies because urlkey is same.

In example:

www.carldenig.nl/wintersport/snowboards.html

This is category Snowbaords

If you choose 'accessoires' it loads nothing.

In admin there are some products published in this category:

www.evernote.com//AnMYgjRWspVEXpQ9LSWbOPcGU1yyaXGVGYM

If we navigate through menu the products are loaded:

www.evernote.com//AnOPyNHRcAdKvZudy3F2SZ3xb67SpBn6Jg4

Hope you can help!
